

Oil Rig Disc Brake Systems

Heavy Duty High Energy Brakes & Ventilated Discs for Drilling and Service Rigs

KEY FEATURES

MECHANISM

spring applied, free floating and self-centering

ACTUATION

spring set and hydraulic or air release.

hydraulic or air applied brakes are also available.

MOUNTING

foot mounted or side mounted

CONSTRUCTION

highest quality steels and cast alloys, all pins stainless steel

SPRINGS

internal coil springs for maximum reliability

LININGS

non-asbestos, easily replaceable, large surface area and thickness for maximum wear characteristics field tested and proven

LUBRICATION

external lube points are located on all critical wear areas

CONTROLS

release indicating / interlock limit switch optional

ENGINEERING

Application and selection assistance available

DISCS

ventilated discs are made from special material which has excellent heat dissipation characteristics

Model: 78HBA Dual Operation, Service and Parking disc brake (self-adjusting option available)

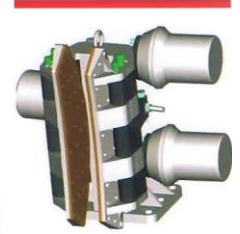

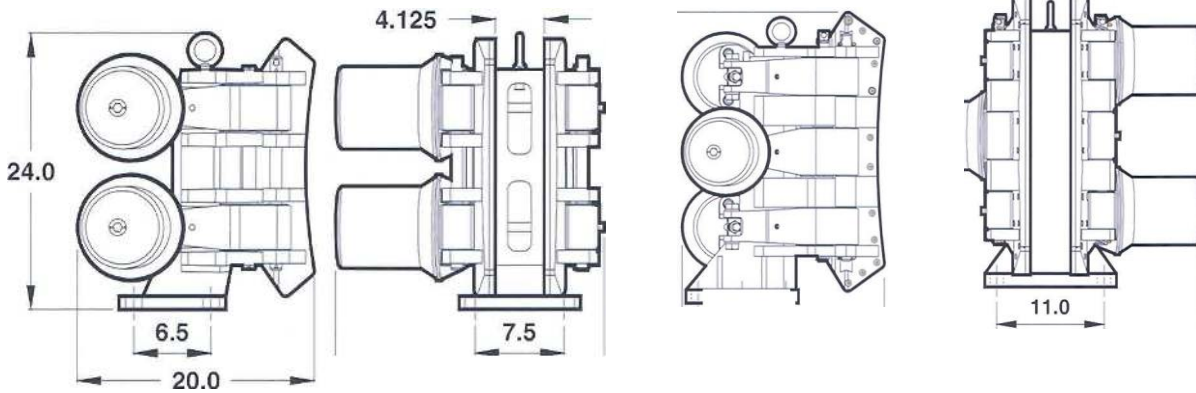

Model: 38HBAX Spring Set Air Released Disc Brake

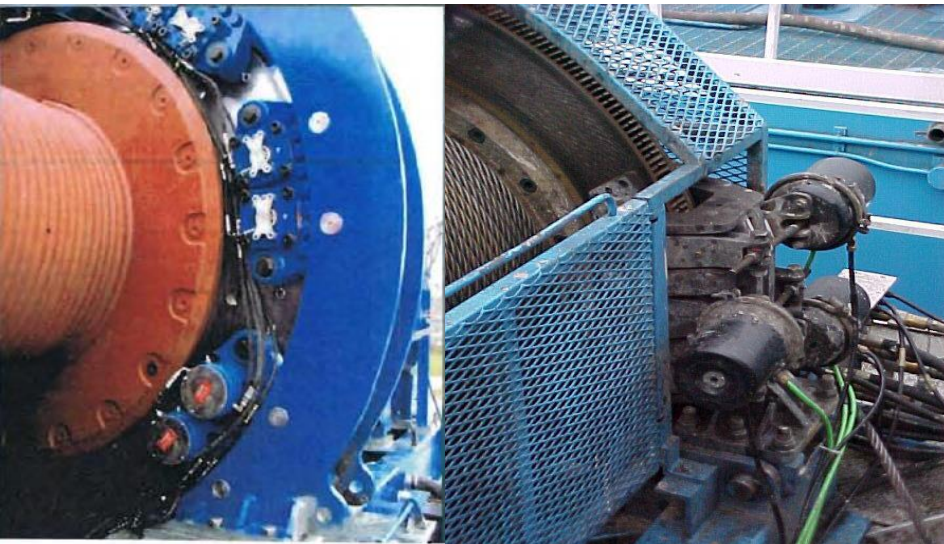

SPECIFICATIONS

Typical Heavy Duty Rig Brakes

3800 and 7800 Series Disc Brakes (foot or side mounting available)

***Ventilated Discs and Sintered Friction Linings available for optimal heat dissipation**

About Kor-Pak Corporation

Founded in 1976, Kor-Pak is a family-run business specializing in industrial braking systems and materials handling equipment for various industrial applications. Kor-Pak is a manufacturer and distributor for both OEM and Aftermarket products and they also possess keen repair and reverse engineering capabilities which helps customers achieve cost savings. Kor-Pak is customer-focused and offers 24/7 support and we go to any length to meet our customers' needs.
